MY SUMMARY

Computer Science student at the Lebanese International University with hands-on experience in web development. I began with frontend development and expanded into backend and database work as my projects became more complex. I currently work with React, TypeScript, Node.js, Express, PostgreSQL, and Prisma, and I'm building a full-stack vehicle rental platform to apply these skills in a real project. I'm looking for a Web Developer internship where I can contribute, learn from an experienced team, and continue developing as a full-stack developer.

EDUCATION

Lebanese International University (LIU) — Tripoli, Lebanon

Bachelor of Science in Computer Science

Expected Graduation: July 2028 | Second-Year Student | **GPA:** 3.08 / 4.00.

TECHNICAL SKILLS

- Languages: JavaScript (ES6+), TypeScript
- Frontend: React, Vite, Tailwind CSS, shadcn/ui, Responsive Web Design, RTL Interfaces
- Backend: Node.js, Express.js, REST API Development
- Database: PostgreSQL, Prisma ORM, SQL
- Developer Tools: Git, GitHub, pnpm, npm, Postman, Vercel, Docker, Linux (Ubuntu)
- Core Concepts: Component-Based Architecture, React Hooks, State Management, API Integration, Database Design, Authentication Authorization, Responsive Design, Multi-Tenant Applications

PROJECTS

Vehicle Rental Management SaaS | [View on GitHub](#)

React · TypeScript · Node.js · Express · PostgreSQL · Prisma · Tailwind CSS

- Developing a full-stack multi-tenant vehicle rental management platform for rental businesses.
- Built REST APIs and database-backed workflows for customers, vehicles, rentals, maintenance, expenses, payments, tasks, and business analytics.
- Implemented authentication, authorization, organization-level data isolation, validation, and structured backend modules using repository, service, controller, and route layers.
- Built a responsive Arabic RTL frontend with reusable components, API integration, rental workflows, dashboards, reporting, and operational management interfaces.
- Designed relational PostgreSQL data models with Prisma and integrated the frontend and backend through a typed API architecture.

Abdallah Hassoun — Portfolio | [View Live](#) | [View On Github](#)

- Built a personal portfolio website using React, TypeScript, Vite, and Tailwind CSS.
- Organized content with reusable components, custom hooks, and data-driven sections for easier maintenance.
- Implemented responsive layouts, dark mode, scroll-based section highlighting, and smooth reveal animations.
- Added an accessible contact form with inline validation, keyboard-friendly navigation, and reduced-motion support.

TRAINING & COURSEWORK

- Understanding TypeScript — Udemy, Maximilian Schwarzmüller
